

12 to 24 Hours Converter

There are two ways of telling the time:

The **12-hour clock** runs from 1am to 12 noon and then from 1pm to 12 midnight. The **24-hour clock** uses the numbers 00:00 to 23:59 (midnight is 24:00 or 00:00).

The 24-hour clock is a time keeping convention where the day runs from midnight to midnight and is split into 24 hours, from hour 0 to hour 24. It is the most common system in use in the world, and is the international standard notation of time (ISO 8601). Times may be displayed in any one of the following formats: 0000, 00:00, 00.00.

In the U.S. and Canada the 12-hour AM/PM format is still more commonly used. In these countries the 24-hour format is called 'Military time'.
